Experience

Workday | Senior Frontend Engineer

2023 - present

Working on a new product, with a monorepo where both backend and frontend are written in Typescript. I also play a mentoring role for a mid-level frontend engineer.

React, Typescript, React Query, Jest, tRPC

Planday | Frontend Engineer

2021 - 2023

Lead frontend on the company's core functionality team. I was in charge of maintaining the frontend aspects of the team's domain, proposing its structure and tech standards. I also played a mentoring role for other frontends, working close together and conducting pair programming sessions.

React, Typescript, React Query, Jest, micro-frontend architecture

Boozt | Frontend Developer

2020 - 2021

I was part of a highly customer facing team, working on a CMS-like application to primarily handle image uploads and ads placing on the Boozt website.

React, Typescript, Redux, Jest

Travtion | Frontend Developer

2017 - 2020

In charge of the Frontend and UI aspects, writing modular code in HTML and Sass for developing the company's software admin tool and white label page.

Angular 2, Typescript, JavaScript, HTML, CSS

Grupo Max | Frontend Developer

2017

Part of a team with two other Frontends, we built and maintained different websites from different clients.

JavaScript, PHP, HTML, Bootstrap

South Studio | Frontend Developer & Co-founder

2015 - Present

Small freelance agency I started with a Product Designer (who happens to be my wife). We built a lot of contrasting websites, and now we use it as a home for our personal projects, a place to be creative, try new things and have fun!

Styled components
Redux

Agile Methodologies

Scrum
Kanban

Agile Tools

Jira
Asana
Trello
Notion

Version Control

Git
SVN

Languages

Spanish | Mother tongue
English | Fluent

Gonzalo Stoll

Hello! My name is Gonzalo, but you can call me Gonza. I'm an Argentinian/Italian currently living in Copenhagen, Denmark. I'm an experienced frontend developer with an honest taste for clean/readable code and a keen eye for visual details. I've worked with JavaScript, HTML and CSS (Scss) for more than 6 years, and also taught some seminars about them.

I've been involved in many cross-functional and domain-specific teams, keeping a great relationship with Product Managers, Designers, Tech Leads and peer devs, always striving to nurture and promote teamwork and team effort.

I'm a sociable and open minded guy who would enjoy sharing a chat whenever possible. Some of my hobbies include writing screenplays and watching movies (Star Wars fan).

I hope to hear from you soon!
